

Meter Union Clamps

Typical Installation

Description

Prevent reversed meters, meter bypasses, and unauthorized meter reconnects economically with Highfield meter union clamps. Hinged design permits easy field installation at the connection nut of the gas meter. Clamps are secured in place with either the lockseal assembly or various barrel locking systems. Meter union clamps are available in 5LT, 10LT, 20LT, and Sprague 1A sizes.

Construction

Fabricated of carbon steel with corrosion resistant plating.

Installation

- 1 Wrap hinged clamp around meter connection nut to meter connection nut.
- 2 Apply lockseal assembly or desired barrel lock and cap to secure.
