

Saddle Lock For Gas Stops

93210172-C

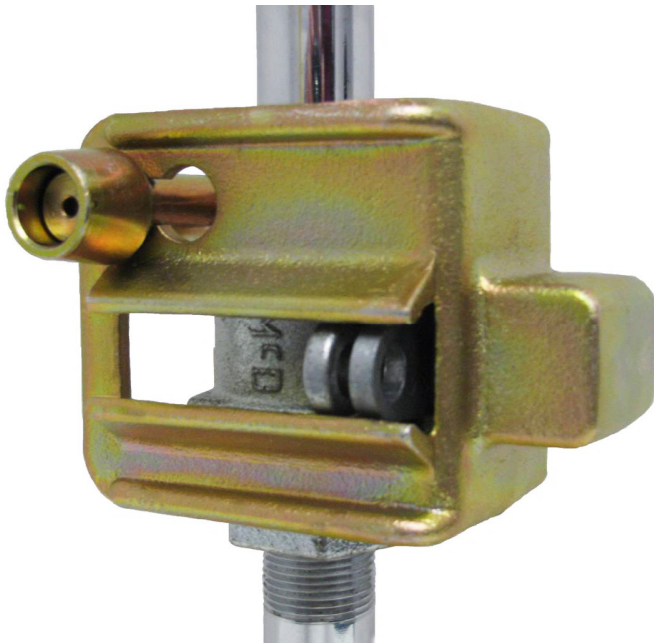

Description

Highfield's Saddle Lock incorporates a number of design innovations, including cast-hardened, plated steel construction that make this product more robust, durable and less susceptible to prying open. New safety features included a redesigned cap that covers the entire head and stem of the valve and a "shroud" to protect the head of the barrel lock. The barrel lock receptor has been reconfigured to keep the barrel lock from being compromised.

The design innovations built into the lock make it resistant to hammer blows, sawing, prying open and other forms of tampering.

Benefits / Advantages

- ◆ Cast-hardened, Plated Steel
- ◆ Barrel Lock Receptor Protects Lock from Physical Attack.
- ◆ Accepts Standard Length Barrel Locks

**Wing Type Application With
Part Number 93210174-C**

Part Number	Description
93210172-C	Saddle Lock For Wing-Less Type 1/2", 3/4" and 1" Gas Valves
93210173-C	Saddle Lock For Wing Type 1/2", 3/4" and 1" Gas Valves
93210174-C	Saddle Lock For Wing Type 1" to 1 1/4" Gas Valves
